

**THE MACRO 2000 TEAM WISHES YOU A PROSPEROUS 2008
AND THANKS YOU FOR YOUR SUPPORT.**

What's new... true to form Macro 2000 has done a lot of development this year.

Shipping Management Systems

A combination of integrated modules that form a whole new system:

Debtors Management system

This is a standard debtor's management system which is completely integrated into the Shipping and Warehousing systems. It has full credit control with status per debtor

Contact Management system

Shipment Management system

Complete shipment file details

Shipping Instructions

Quotations/Estimates

Shipment workflow management and tracking

Full Voyage Management and Documentation

Shipment Planning

Interface to Warehouse and Goods Receipt and Goods Issue Planning

Warehouse Management System

Stock Identification per customer

Bar Code Labels and Wireless Scanning

Warehouse Receipt, Cross-docking and Warehouse Issues

Bonded cargo

Stock Takes and \Stock Reporting

LCL Container Management

Shipment Charge/Invoicing System

Invoices will be generated per shipment.

The invoice is automatically linked to the quotation

There may be one invoice or multiple invoices per shipment.

Generally the following invoices will be generated:-

- Shipment Invoice
- Storage Invoice
- Sundry Invoices

The system will allow as many invoices as needed.

Warehouse Charge/Invoicing System (integrated into the Shipment Charge system)

Storage Invoices will be created automatically by the system and are generally created in a separate run, due to the fact that they are based on stock in the warehouse, and the period that stock is in storage.

Container Management System

Full and Empty Container Receipt and Dispatch

Records Repairs, Maintenance, washing and cleaning

Integrated to shipping invoice system

Purchase Order System

Customer Supply Chain Management System

Project Operations Management

This is combination of integrated modules that acts as a practical tool for getting things done and reporting on progress.

Transport Management Systems

Controls trucks/containers in and out of the yard

Covers routing and planning

Transport suppliers are registered as suppliers on the Supplier master file.

Transport Instructions to be generated as needed.

The system will print the transport order

The system will generate an automatic invoice to the creditors system, when the transport dispatch is confirmed.

The invoice will be automatically be paid, with the periodic creditors payments.

The transport order will be emailed to the supplier.

Transport orders will be costed.

The system will include a rule for the value to be recovered from the customer.

The transport order will be written to the extra charge file, for automatic inclusion in the shipment invoice.

Warehouse invoicing has had extensive enhancements. Many new options to charge are available. If you are interested to find out what is available send us an e-mail for details.

Remember to use the Macro 2000 upgrade facility that is covered by your maintenance contract. All the new features and enhancements are available to our windows based customers. We are still offering a 75% discount on cross grading to Windows. Call us for details

Welcome to our new customers:

Breakeven Cold Store, Clayville Cold Store, Celmep Logistics, Blue Sky Logistics

CUSTOMER SUPPORT.

YOU can improve the way we support you....

Monique has set up processes for support from Macro 2000.

A request form needs to be completed and is traced through our tracking system until completion. Call us for more information.

REMOTE SUPPORT

Give Macro 2000 permission to sign on to your server and we will schedule regular remote updates or enhancements to your system. Call us for more information.
